Student Director: Jordan Hansard

Project Goals:

To form an Energy Team to learn about renewable energy, to do specific energy activities in the science classrooms and distribute energy materials, to involve the community in planting trees for energy conservation.

State Honorable Mention Junior Level School of the Year

Clarksburg School- Clarksburg
Project Advisor: Jeannine Stokes
Student Director: Elizabeth Stokes

Project Goals:

Promoted "Kids teaching Kids" about energy related topics, hosted an energy fair promoting energy conservation.

CLARKSBURG SCHOOL

Student Summary

We are the Clarksburg School Team. We participated in the Energy Education Program since August 2003. We have completed two projects for the Energy Education Program since August 2003.

Our first project began when we received Energy Kits from the National Energy Education Development. Fifth grade students visited fifth grade students classrooms and showed them the energy kits to fifth grade students. These demonstrations were given in the regular science classroom. The fifth grade students used the energy kits to improve eye safety and to learn about energy safety. The fifth grade class taught the younger students about energy safety.

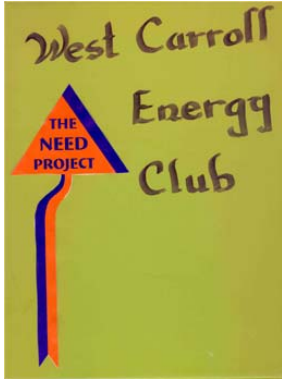

Our second project was to host an Energy Fair. The goal was to educate the community about energy and to show them the energy kits. We crossed the curriculum to teach energy conservation, reading, and writing. We were the state finalist for reading for research. We were recognized for our energy conservation and the interest for the best sources of information for our group projects.

These projects were our main concerns this year. We hope to move on to bigger projects next year that will reach further into our community.

2004 National & State NEED Winners (Continued)

State Senior Level School of the Year

West Carroll High School- Atwood
Project Advisor: Nancy Johnson
Student Director: Lydia Mayberry
Project Goals:

To help the entire school reduce energy consumption, to involve the community in adopt a tree and landscaping for energy conservation, put in place a workable recycling program for the school and community.

State Second Place Special Group of the Year

Brighton High School-
Tipton County 4-H- Covington
Project Advisor: Tim Hicks
Student Directors: Jodie Egbert and
Marshall Simpson
Project Goals:

To develop a county wide NEED educational program, cooked with alternative energy sources, adopted and trained 5th grade students, promoted energy through posters and quizzes, students created leadership teams, and create energy education kits for teachers.
